

Top-Management-Consulting – Digitalization & Innovation Strategy Consultant (junior roles up to Manager)

Who we are

Since 2010, we enable organizations to use technology and data to serve customers increasingly better, faster, and cheaper. We work with visionary leaders in business and society to help them capture technology-enabled growth opportunities, transform the ways they serve their customers, and drive organizational change.

We do this through five main types of services: digital strategy, digital transformation, ventures & scale-ups, mergers & acquisitions, and analytics & AI. We look at businesses through a customer lens to determine what is needed in terms of organization, way-of-working, technology, and data. We believe these should work together seamlessly to achieve the highest speed of learning, which is the new competitive advantage.

We are the number #1 digital strategy consultancy in the Netherlands, delivering customer and business value all over the world for organizations like eBay, CarNext.com, Bol.com, HEINEKEN, Henkel, ING, and Wella, and have recently opened an office in Germany. We believe we have just entered an era of new-technology-driven disruption that will not leave a single industry or sector unaffected. Only by embracing change and showing true leadership will we all continue to experience growth. Together with visionary leaders, we clarify what needs to be done, determine how to do it, and embed capabilities and change needed to get it done throughout all layers of the organization. This role suits applicants with a can-do mentality and a passion for digital.

About the role:

As an Associate, you will get the chance to make an impact every day – no 2 days are the same. You will be part of client teams from day 1, not only structuring and performing analyses, but also taking on hands-on roles in client transformations, the set-up of new digital ventures, and building digital businesses. These responsibilities, in combination with the daily cooperation with Managers, Partners, and clients, provide an unparalleled range of opportunities.

We embrace a coaching and learning culture to develop digital business leaders. We support your personal development through on-the-job coaching and formal training covering consulting skills, interpersonal skills, and digital expertise. The diversity of (international) projects, which will give you the opportunity to get to know on average 10 organizations within a year, will contribute to the steep learning curve that you will experience. You will be amazed by how much you will learn in a short amount of time!

Requirements

- Academic degree with excellent results
- Outstanding analytical and social skills, a can-do mentality, and a passion for digital
- Fluent in German and English

What we offer

- Competitive salaries and regular reviews
- An excellent combination of personal development and training programs to ensure personal growth to accelerate your career and help you reach your goals
- The opportunity to join a young team in our Düsseldorf office that is rapidly expanding, and a chance to actively shape the local work and office culture during this period
