

# Telecoms Group: (Senior) Project Manager Value & Efficiency

## Was wir bieten

- **Herausfordernde Inhalte:** Auf dich warten hochinteressante, komplexe und strategisch relevante Transformationsprojekte, die du für das Top-Management eines international erfolgreichen Telekommunikationskonzerns entwickelst und umsetzt.
- **Tolle Teamkultur mit 80/20-Modell:** Basis unseres Erfolgs: unsere einzigartige Kultur. Was steckt dahinter? Regelmäßige Teamevents – mal Richtung Sport, mal Richtung Kultur – die den Zusammenhalt stärken. Aber auch die Tradition unseres »Center Fridays«: Ein Tag, den wir uns so gut wie möglich frei halten von klassischer Projektarbeit. Um uns weiterzubilden – zum Beispiel bei einem Kollegenvortrag über agiles Arbeiten. Um unseren Horizont zu erweitern uvm.
- **Individueller Entwicklungspfad:** Wir zeigen dir einen klaren, nachvollziehbaren und überprüfbaren Entwicklungspfad auf. Neben wichtigen fachlichen und methodischen Kenntnissen, die im Projektalltag und speziellen Trainings geschärft werden, liegt der Fokus hier vor allem auf der persönlichen Weiterentwicklung. Großer Freiraum, um eigene Themen und Ideen zu entwickeln und voranzutreiben darf dabei auch nicht fehlen.
- **Funktionierende Work Life Balance:** Jenseits des klassischen 9to5-Schemas setzen wir auf ein hohes Maß an Flexibilität und Familienfreundlichkeit.

## Was wir suchen:

We are looking for experienced employees for our "Value & Efficiency" team. If you are enthusiastic about content-related design work, if you would like to take on project responsibility in cross-business unit projects, and if you are also motivated by consulting then this is the place to be for you! From day one on, you will advise in major strategic transformation projects nationally and sometimes also internationally.

Creating value in an efficient way is what a company sets apart from its competition and secures long-term growth. And this is precisely the goal we are striving to achieve for the Group with our topics at Value & Efficiency. "Value & Efficiency" (V&E) stands for-1) Creating Value and 2) Being efficient and driven by numbers. In terms of creating value we focus on organic and inorganic growth topics, such as business development, building up new business models and/or units, partnerships, investments, M&A and PMI activities. Sustainable Finance and ESG topics are also in the core of creating value in a sustainable way and therefore a focus topics. On the Efficiency side we prioritize several finance-driven topics, such as digital finance, financial & commercial forecasting, performance management, benchmarking, investor relations & capital market topics, and overarching efficiency & transformation programs. "

What our colleagues look like?

As part of V&E you should really like to create an impact – either through driving value or creating efficiency. If you have a background in finance, M&A, commercial management, ESG a background with general business administration and an interest in the above focus topics, you are a good fit for our V&E team. An important side note is that our colleagues like to work data- and fact based, while also ensuring to enable our internal customers to be the most successful by themselves. Capital market updates, general macro-economic factors and an interest in what's going on in the business world should be a given.

## **Profil:**

You are enthusiastic about telecommunications and the opportunity to help shaping the development of the Group. In addition to a successfully completed bachelor's, master's or diploma program with honors you have:

- 4-7 years of relevant experiences in consulting (or less for the senior consultant roles)
- Entrepreneurial mindset, drive, and creative thinking
- Willingness to challenge top management on business topics
- Ability to work in teams with strong customer orientation, Strong analytical thinking and problem-solving skills
- Excellent language skills in English and basic German skills (min. C1)

Based on your professional experience you bring good knowledge in the following areas:

- CFO-related topics, incl. development, validation, and implementation of business models
- Profound experience in financial management and business analysis
- And/or PMI-projects
